PROJECTS

RESPONSIVE APP DESIGN OF DARKROAST

Figma

Developed a comprehensive mobile application for Darkroast, a local coffee shop, to enhance customer engagement and streamline the ordering process.

- Led the design and development of a responsive user interface, incorporating modern design principles to enhance usability and aesthetics.
- Utilized HTML and CSS to create a seamless and adaptive layout that adjusts to different screen sizes, from desktops to smartphones.
- ensuring optimal user experience across various devices and screen sizes.

REDESIGNING BHIM APP

Figma

A mobile application for SecureBank, a financial institution, to provide customers with a secure and user-friendly platform for online banking transactions.

- Integration of secure authentication protocols (biometric, authentication).
- Implemented a bill payment feature, enabling users to pay utility bills, credit cards, and other payments directly through the app.
- Proposed future enhancements, including biometric updates, additional financial management tools, and enhanced analytics features, to further improve the app's functionality.

BOOK SUGGESTING PLATFORM

C++

Designed to revolutionize the reading experience by providing personalized book suggestions based on user preferences and interests.

- Developed a user-friendly profile section for users to track their reading history, preferences, and ongoing book recommendations.
- Implemented a robust search functionality with advanced filters, enabling users to easily discover books based on genres, authors, or themes.
- Conducted thorough testing to ensure the app's reliability, data security, and responsiveness.
